Contents

Foreword			vi
Introduction	D. H. Wilkinson		1
Chapter 1	R. J. Blin-Stoyle	An introduction to exchange effects in nuclei	5
Chapter 2	A. Arima	Nuclear magnetic moments and Gamow-Teller matrix elements — configuration mixing vs. mesonic effects	41
Chapter 3	M. Ericson	Pion field and weak interactions in nuclei	67
Chapter 4	M. Rho	Meson fields in nuclei	105
Chapter 5	A. M. Green	Nucleon isobars in nuclear structure	141
Chapter 6	T.E.O.Ericson	Somewhat virtual pions	173
Chapter 7	O. Kofoed-Hansen	The role of mesonic degrees of freedom in scattering of hadrons on nuclei	193
Chapter 8	C. Wilkin	Some thoughts on meson exchange current effects in hadron-nucleus scattering	225
Chapter 9	J. P. Deutsch	"Ouvertures" in muon capture	247
Chapter 10	N. C. Mukhopadhyay	Nuclear muon capture - theoretical aspects	253
